

XPEDENT

INTRAORAL SCANNER

Fast digital impressions • Comfortable scanning • Flexible workflow

HIGH-PRECISION SCANNING Accurate digital impressions and efficient chairside capture.	15 mm DEPTH OF FIELD Broad depth of field for effective intraoral data acquisition.
ANTI-FOG Built-in anti-fog support helps maintain scanning continuity.	SMART PROCESSING Automatic removal of redundant scan data such as gloves and tongue.
OCCCLUSION ANALYSIS Supports digital analysis of the occlusal relationship.	HYGIENE Designed to support multiple disinfection methods.

Designed for the Digital Dental Workflow

XPEDENT's intraoral scanning platform combines high-precision optical scanning, real-time 3D capture and intelligent software functions to support efficient digital impressions and case communication.

RESTORATIVE Crowns, bridges and restorative workflows	IMPLANT Digital data for implant restorative workflows	ORTHODONTIC Digital models for orthodontic workflows
---	--	--

Software Advantages

- Real-time 3D scanning and visualization
- Automatic removal of unwanted scan data
- Occlusal relationship analysis
- Efficient digital case transfer and communication

TECHNICAL & CLINICAL OVERVIEW

Feature	XPEDENT Intraoral Scanner
Scanning	High-precision digital intraoral scanning
Depth of field	15 mm
Anti-fog	Built-in anti-fog module
Data optimization	Automatic removal of redundant scan data
Occlusion	Occlusion relationship analysis
Hygiene	Supports multiple disinfection methods
Applications	Restorative, implant and orthodontic workflows

Why Digital Impressions?

Patient Comfort Avoids conventional impression material for suitable digital cases.	Efficiency Simplifies case handling and reduces physical impression steps.
Communication 3D data supports visualization and clinic-laboratory communication.	Repeatability Specific areas can be rescanned when more data is required.

XPEDENT International

XPEDENT describes itself as a dental medical-device group spanning Europe, America and Asia, headquartered in the UK, with manufacturing operations in Guilin, China. The manufacturer states that its products are supported by R&D; technology from XPEDENT UK.
